

Shamanic Journeying Circle

A Monthly Circle Facilitated by Gretchen Crilly McKay
Next Circle is April 27, 2019

The current climate of chaos and uncertainty affects all of us, creating uncertainty and confusion about the future. In this class we will connect with our Lower World and Upper World compassionate spirit allies for the purpose of receiving insight and guidance for healing ourselves and Mother Earth.

Journeying is the foundational tool for shamanic study and healing and provides the passageway that has been used for centuries to obtain information from other dimensions, realms, and realities. Through the journeying process, you can receive information, knowledge and wisdom which you can utilize for solving problems, gaining clarity about life's circumstances, or simply to build your awareness and understanding of the different worlds beyond. Journeying is a perfect way to learn what direction is needed in your life to facilitate wholeness.

This is an experiential class where we will enter non-ordinary reality using the shamanic journey to receive direction. In this monthly journeying class we will connect with our Lower World and Upper World compassionate spirit allies for the purpose of healing ourselves and our communities.
